Technical advisory service:

We will be happy to assist you on the phone if you encounter any technical errors or malfunctions. In some cases the problem can be solved by just ordering the required spare parts. Please contact us at: 0049-7156-4907-0.

In rare cases GANN products may have to be serviced or repaired. Defective devices will be handled by our service department.

- 1. Please only send measuring devices and accessories made by GANN. Products made by other manufacturers will not be attended to and will be returned unrepaired.
- 2. All repairs are carried out by our service department in Gerlingen. Please consider a duration of approx. 5 to 10 workdays for repair.
- 3. All parcels have to be sent to us carriage paid. We will refuse to accept parcels that have been sent carriage forward.
- 4. Please enclose a service order /repair order to your parcel. Alternatively, you can fill in our repair form and attach it to the consignment. If we receive meters for repair without such a document, handling will be delayed we may have to find out the actual owner and request a written order.
- 5. If you have accessories for your device, pleased send those to us, too. Sometimes the source of an error is not the meter itself but an accessory.
- 6. If desired, we will issue a cost estimate before carrying out the repair. If you choose NOT to have the repair carried out, we will have to charge a fee of 30.00 EUR for the cost estimate.
- 7. If it is a warranty case, the repair will be carried out free of charge (in accordance with our General Terms and Conditions of Sale and Delivery). Please enclose a proof of purchase.
- 8. Advice for consignments from **non-EU countries**: For customs clearance an invoice or pro-forma issued by the shipper is required. This invoice is to be considered a strictly formal requirement. It provides the assessment basis for import duties that may have to be paid. Please attach the invoice to the outside of the parcel, so that it is clearly visible.

This invoice must contain the following information:

- customs tariff code (moisture meters: 90318080)
- reason for return: check/repair
- number and type of packages

- value: Please indicate an approximate value for the goods, for customs authorities impose import duties also on devices to be repaired. These import duties will be charged in addition to the repair cost.

Shipment by post: if there is no invoice attached, the parcel will not be cleared by the customs at first. For subsequent customs clearing a fee of 28.50 € will be charged by the German Postal Service, which we will have to pass on to the sender.

Our national tax authorities demand a proof (e.g. certificate of registration) of the respective customer's commercial activity as a prerequisite for VAT-free provision of services (e.g. repairs). Please enclose such a proof to your parcel. Otherwise we will have to charge VAT.

GANN Repair form – please fill in and enclose to your parcel

I hereby place the following order:

Custor	ner no. (if available):		
Compa	any:	Phone:	
Street	address:	Fax:	
Postal	code:	Website:	
City/co	ountry:	E-mail:	
		VAT no.:	
Produ	ct(s) sent: - please state reference no(s). an	d serial number(s), if available	
provid		ose a copy of the proof of purchase, if available – for warranty	y cases
0	Please repair the device without issuing a cost	estimate.	
0	If the expected costs exceed the amount of EUR net, please send a cost estimate by e-mail or fax before carrying out the repair. Note: a fee $30 \in (+ VAT, if applicable)$ will have to be charged for handling and issuing the cost estimate. If the repair is carried out, this amount will be offset against the repair, of course.		
0		If the warranty period (12 months after the instrument has been so by warranty, please send a cost estimate, as described above. (Note	

date, signature
